

International Seminar on Climate Change Implication on Migration (IS-CCIM): Role of US Real Estate Management Toward Livelihood Opportunities

26 April 2024, Conference Room, New Building School of Urban and Regional Planning, University of the Philippines, Diliman, Quezon City, Philippines

ABOUT IS-CCIM

There has been a growing attention on the impact of climate change on human migration among scholars and policymakers. Climate change has been determined to be a key driver of mobility in various international agreements such as the Agenda for Humanity, the 2016 United Nations Summit for Refugees and Migrants, and the Global Compact for Migration and the Global Compact on Refugees. Rising global temperatures and more frequent and intense extreme weather events are leading to displacement and migration of populations. European countries have formulated policies to accommodate climate change-related migrations, while the United States, given its extensive real estate industry, could play a significant role in addressing similar challenges.

The International Seminar on Climate Change Implication on Migration: Role of US Real Estate Management Toward Livelihood Opportunities, organized by Planning Development and Research Foundation, Inc. (PLANADES) is planned to delve into the implications of climate change on migration and explore how the US real estate management sector can create livelihood opportunities for affected populations. Additionally, the seminar will cover various climate change-related impacts on communities, including changes in weather patterns, drought, illnesses, and health stresses, as well as discuss disaster risk reduction and climate change adaptation in urban and rural planning processes.

The international seminar will be conducted in a hybrid format, and will feature keynote speeches, panel discussions, paper presentations, and interactive sessions. Participants will share their research, experiences, and best practices to benefit direct and indirect stakeholders, fostering collaboration and informing decision-making for building resilient societies. A virtual platform will ensure global participation, enabling stakeholders from diverse backgrounds to engage and contribute to the discourse on climate-induced migration and its multifaceted implications.

TARGET PARTICIPANTS

The seminar will bring together policymakers, researchers, practitioners, and representatives from academia, government agencies, non-governmental organizations (NGOs), and the private sector. Participants will include professionals working in the fields of sustainable development, risk-sensitive urban planning, risk-informed real estate management, climate change-related migration pattern studies, and community development.

PUBLICATION PARTNER

Selected abstracts will be requested to submit a full paper for consideration in a Special Issue of the Scopus Journal. Otherwise, it will be published in the Book of Abstracts.

INSTITUTIONAL PARTNERS AND SUPPORT:

THEMATIC AREAS

A. Nexus Between Climate Change and Migration

1. Drivers of Climate-Induced Migration
2. Impacts of Climate Change on Migration Patterns
3. Policy Responses to Climate-Induced Migration

B. Mainstreaming DRRM and Climate Change Adaptation in Real Estate Management and Planning

1. Integrating Climate Resilience into Urban Planning
2. Building Codes and Standards for Climate Resilient Infrastructure
3. Green Infrastructure and Sustainable Development in Real Estate

C. Public Private Partnerships in Climate Change and Disaster Risk Reduction in Achieving Sustainable Development Goals

1. Role of Private Sector in Climate Change Mitigation and Adaptation
2. Collaborative Initiatives between Government and Private Sector
3. Funding Mechanisms for Public-Private Partnerships in Climate Action

D. Resilient Communities

1. Risk-Sensitive Physical and Development Planning
2. Community-Based Disaster Risk Reduction Strategies
3. Early Warning Systems and Community Preparedness
4. Social Protection and Resilience Building in Vulnerable Communities

E. Climate Change and Disaster Risk Reduction Finance

1. Innovative Financing Mechanisms for Climate Resilience
2. Financial Instruments for Disaster Risk Reduction
3. Mobilizing Climate Finance for Adaptation and Mitigation Efforts

ABSTRACT SUBMISSION

We are now accepting abstracts for oral or poster presentations for organized sessions and exhibits relevant to the International Seminar on Climate Change Implication on Migration (IS-CCIM) sub-themes.

The core of the event will cover an important aspect of climate change migration, disaster risk reduction, reduction, as well as the role of urban and rural planning in mitigating climate-induced challenges.

The PLANADES organized steering Committee solicits abstracts from the PLANADES International Fellowship Program members, community of Environmental Planners, Engineers, Scientists, social sciences practitioner across Asia-Pacific and globally. We review the abstracts as the basis for the selection of speakers for the event Thematic Areas. Abstracts need to be concise and reflect the value of the topic to the event agenda. Abstract submissions should not be longer than 150 words.

ABSTRACT SUBMISSION GUIDELINES

- All interested authors are invited to submit one abstract for the seminar, relevant to one or more thematic areas.
- The deadline of submission **is moved to 23:59 PM GMT+8 (Manila Time) on 16th April, 2024** from 10th April 2024.
- Abstracts must only be submitted through the Google Form. Abstracts submitted via email or other media will not be entertained. No specific formatting is required.
- The abstract should contain introduction, objectives, methods, highlights of results, conclusion and recommendation and must be limited to **150 words**.
- The abstract should be written in clear and concise language, avoiding jargon and provide a brief and understandable overview of the research, enabling reviewers and attendees to grasp the key points easily.
- Authors must ensure that their abstract is relevant to the conference's objectives and the thematic areas mentioned in the abstract call. The research and/or work presented must contribute to the discussions and discourse of the conference.
- Submissions should be based on successful experiences and lessons learned in designing, implementing, and evaluating projects, programs, initiatives, and business models.
- Abstracts should focus on practical and implementation-oriented aspects rather than theoretical discussions.
- Authors should provide accurate and complete information about themselves, including their contact details, affiliations, and any other required information specified by the conference organizers.
- Authors will be notified about the outcome of their abstract submission within three business days via email, upon which they will receive an Abstract ID and further instructions regarding the payment and registration process.
- Abstracts must be submitted through this link:
<https://tinyurl.com/ISCCIM-Abstract-Submission>
